

Service Advisor: Right fix every time

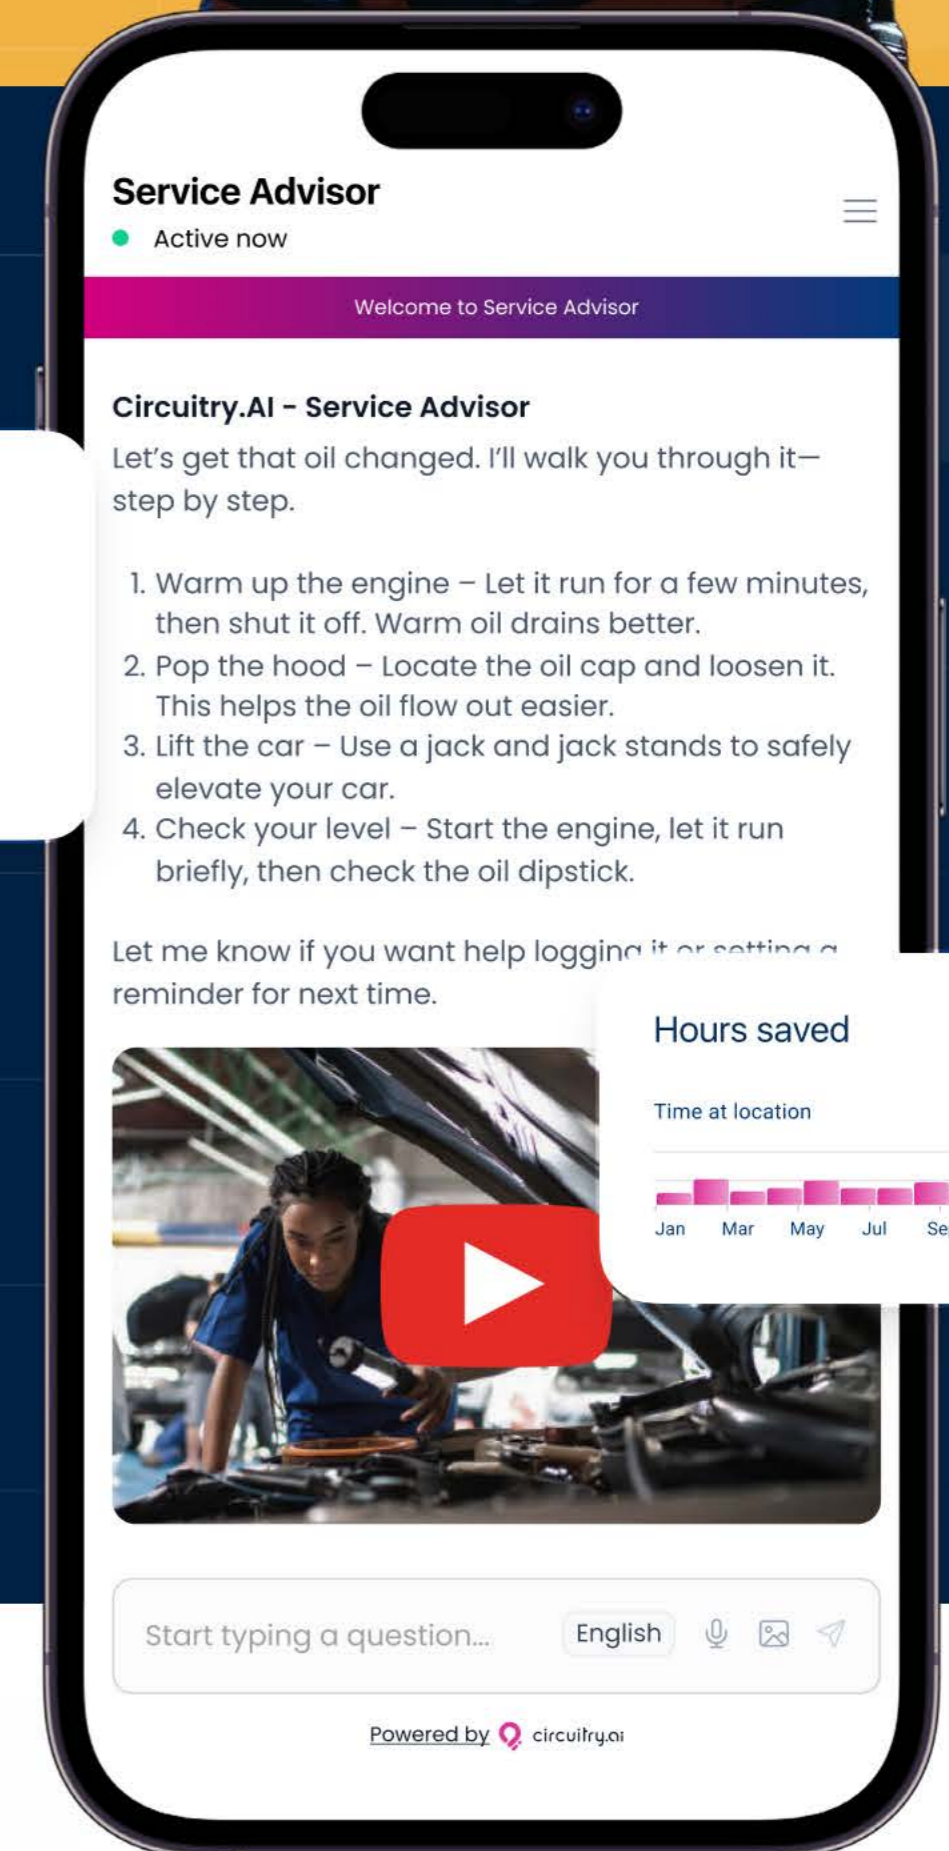

Technician shortages, product downtime, and repeat fixes damage customer satisfaction and profitability. Circuitry.ai Service Advisor, purpose-built for manufacturers and trained on complex service knowledge, delivers precise, real-time guidance to boost productivity, improve first-time fix rates, and accelerate service resolution.

Benefits for all stakeholders

Field service, contact centers, dealers, self-service

- Boost technician and agent productivity
- Increase first-time fix rates and reduce truck rolls
- Provide pre-visit instructions and precise repair guidance
- Ensure accurate, instant answers from your service knowledge
- Reduce downtime and improve customer satisfaction

Why choose Circuitry.ai?

Specialized Industrial AI

We help manufacturers make **faster service decisions** with AI trained on proprietary service data and knowledge.

Unmatched Accuracy

Specialized AI Advisors deliver **95%+ accurate answers** to support service decisions and drive better outcomes.

Optimized Outcomes

Our suite of AI-Powered Advisors boost productivity by **35%**, improve handling times by **45%**, and reduce downtime by **10-20%**.
