# Right Parts for the Repair. Every time

Service and repair parts are critical to profitability for manufacturers and dealer networks. However, delays or errors in parts selection can lead to lost sales, higher costs, and dissatisfied customers.

Parts AIdvisor, powered by our Decision Intelligence Platform, addresses these challenges by empowering service technicians with AI-driven parts recommendations.

circuitry.ai

## Benefits for all stakeholders

### OEMs, Dealers, Suppliers, and Customers

- Boost team productivity
- Enhance parts support center's efficiency
- Ensure accurate dealer repairs with correct parts recommendations
- Leverages your parts catalog and interactive diagrams to identify the right parts every time
- Automate parts sourcing for pricing, shipping time & cost, and parts warranty

## Why choose Circuitry.ai?

### Parts Recommendations
Accurate parts recommendations derived from a comprehensive analysis of your historical data and detailed service records.

### Interactive Parts Diagrams
Highlights specific parts directly on detailed parts diagrams, allowing users to easily identify and focus on individual components.

### Right Parts. Every Time
Suggests parts for repairs based on historical claims and service order data.
