

Parts Advisor: Right part every time

Delays or errors in parts selection can cause lost sales, extended downtime, and unhappy customers. Circuitry.ai Parts Advisor, built for manufacturers and trained on complex parts catalogs and BOMs, delivers accurate, real-time recommendations to boost productivity, drive sales, and speed up service.

Benefits for all stakeholders

OEMs, dealers, suppliers, and customers

- Boost team productivity with faster part identification.
- Eliminate manual parts lookup.
- Improve parts center efficiency and response times.
- Reduce errors with accurate, AI-powered part recommendations.
- Use your catalogs and BOMs to guide teams to the right part.
- Automate sourcing details like availability, pricing, and shipping.

Why choose Circuitry.ai?

Specialized Industrial AI

Circuitry.ai uses AI trained on **proprietary parts data** to power fast, accurate parts decisions for manufacturers.

Unmatched Accuracy

Specialized AI Advisors deliver **95%+ accurate answers** to support parts decisions and drive better outcomes.

Optimized Outcomes

Circuitry.ai delivers **35%** higher productivity, increase parts sales by **15%**, and enhances logistical efficiency by **20%**.
