# Warranty AI: Right decision at every turn

Manual reviews and inconsistent claims slow warranty teams and drain resources. Circuitry.ai enhances your existing systems with AI-powered Warranty Decision Intelligence—automating decisions, reducing costs, improving product quality, and elevating the customer experience.

Benefits for all stakeholders

OEMs, dealers, suppliers, and customers

- Boost team productivity in claims, returns, and recovery
- Process claims faster and more accurately
- Improve dealer cash flow and reduce rejected claims
- Make consistent decisions on warranty and recovery parts
- Automate routine tasks across the claim process

I need claim number:65748596 to be checked and I'll need a claim score
