

Field Decision Intelligence

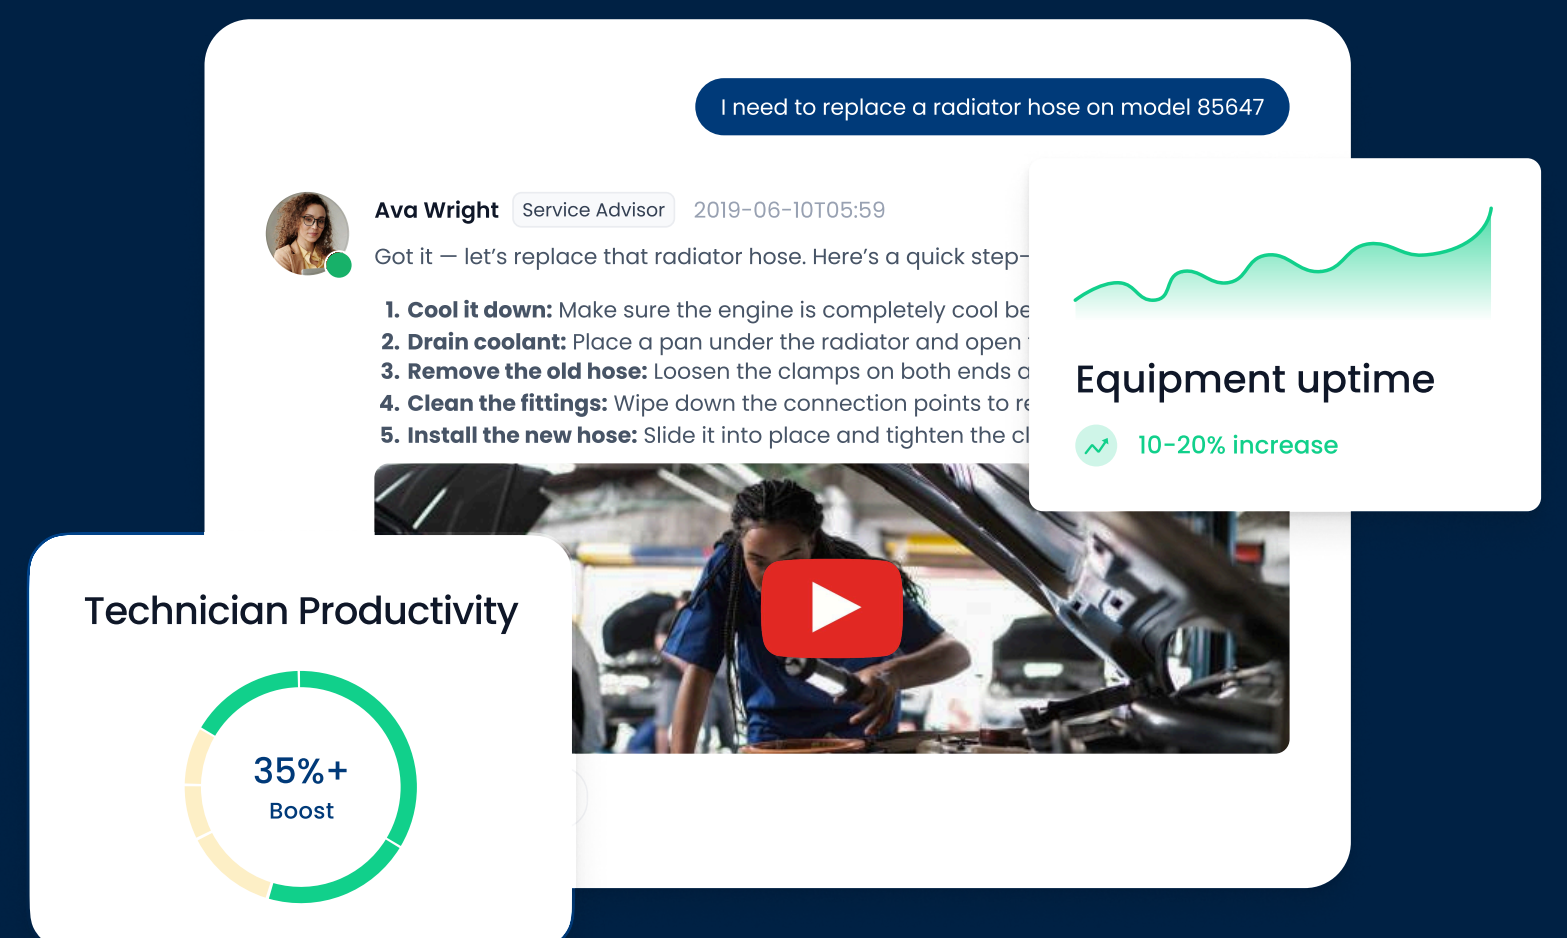

The only AI-powered Decision Intelligence layer that lowers visits-per-fix and automates regulatory compliant documentation.

Benefits for all stakeholders

- Lower truck rolls per incident from the industry average of 1.8 to 1.1.
- Eliminate parts guessing with the exact part predictions before the truck rolls.
- Recover missed revenue by flagging out-of-scope work during visits.
- Reclaim 20+ hours per engineer each week by automating admin tasks.
- Protect renewals by shifting SLAs from response time to uptime.
- Guide technicians with AI-powered Service Advisor, reducing MTTR by 35%.
- Automate compliant case documentation with pre-filled service records.

Why choose Circuitry.ai?

Regulatory compliance

Our AI worker outputs are traceable and auditable, and compliant with ISO, CFR Part 11, SOC, and FDA standards.

Optimized outcomes

Our suite of AI workers boost productivity by 35%, improve handling times by 45%, and reduce downtime by 10-20%.

Faster time to value

We deploy in weeks and integrate with your existing FSM (Salesforce, ServiceMax, ServiceNow, etc.).

AI-powered Field Decision Intelligence

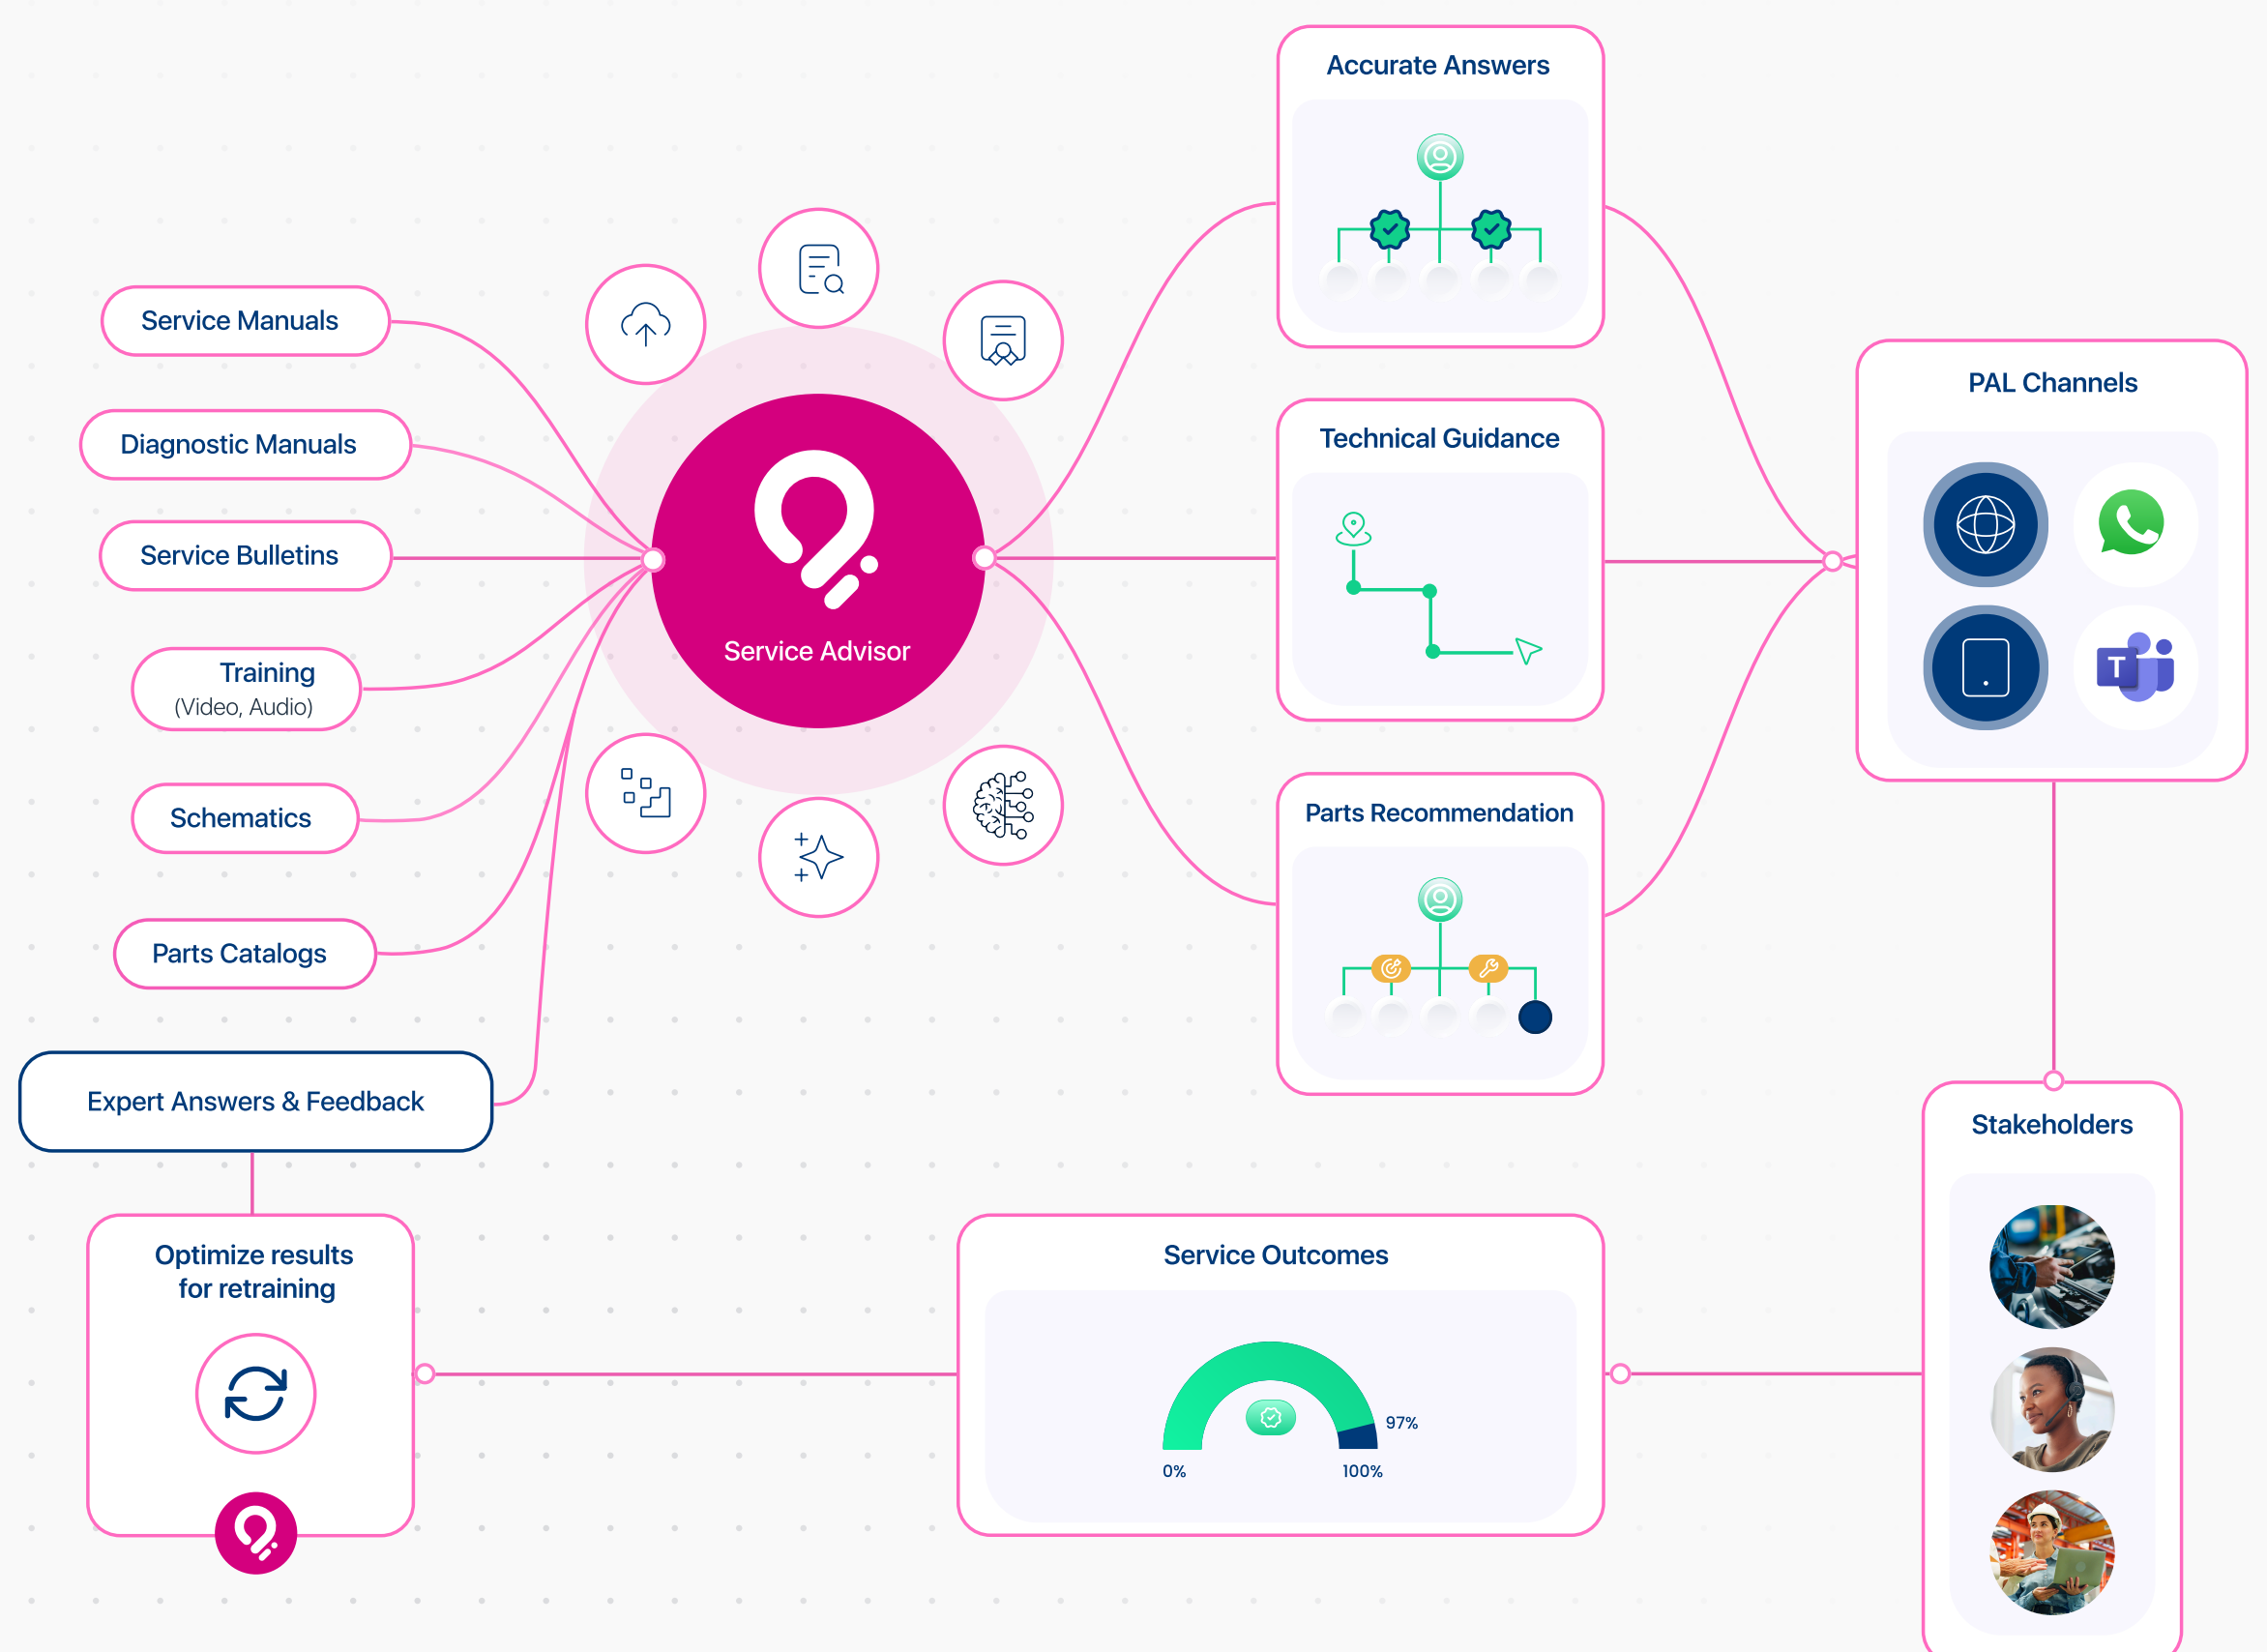

Field Decision Intelligence combines multiple AI technologies and builds on modern field service tools to offer actionable context-aware insights that help technicians work smarter.

Field Decision Intelligence powers every fix

Circuitry.ai's Field Decision Intelligence enables medical device service teams with AI workers that guide repairs, automate routine work, and surface performance insights.

- Service and Parts Advisors deliver troubleshooting and parts recommendations.
- AI Agents execute routine actions across systems.
- AI Analysts track outcomes and highlight ongoing service gaps.

Realize faster ROI with Field Decision Intelligence

We use your historical service records to identify the entitlement leakage and unbilled labor hidden in your P&L. See the exact workflow that eliminates administrative drag.
